SPPSS350™

The SPPSS350 portable solar system combines highly efficient solar panels , a solar charger, a power inverter and a Lithium Polymer battery into a robust, waterproof case creating an easy-to-use, 'plug and play' back-up system.

This system is specifically designed for mobile off-grid applications, where space and weight limitations are abundant. The SPSS350 portable solar system is the perfect system for emergencies providing up to 532 Watt-hours of energy. The built-in solar charge controller allows the expansion of an additional 18v solar panel (Max. 70w).
