# Installation Manual- HIGHLIGHT HL-ML-FL-U

1. Fix solar system frame to a u-bracket with 4 screws. Adjust the angle to south face to collect the highest solar radiation.

2. Fix the led module to the small u-bracket with 4 screws for each one, rotate the lighting angle to illuminate area.

3. Connect to with T shape wire to solar panel connector.
   Each connector from T-shape wire connect to LED board connector then Turn on the solar system with on/off button that located on the solar panel, lights will turn on automatically when dawn(to test system during the day, cover the solar panel with blanket for 5 minutes then lights should come on- we would recommend to charge the fixture for 24 hours before test)
